Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 3,6-22, 56-59 and 62-71 are rejected under 35 U.S.C. 103(a) as being unpatentable over Miller, Muszak et al. or Carey et al. in view of Hamilton et al. (USP 4,568,519)

See the appropriate paragraph of the 8/18/04 Office action for the teachings of Miller, Muszak et al. and Carey et al.

Miller, Muszak et al. and Carey et al. are silent to a drive means that selectively moves samples in a radial direction along a common horizontal plane.

Hamilton et al. teach a device for processing slides comprising a slide distributor(16) that selectively moves samples in a radial direction along a common horizontal plane. Column 1 lines 63 through column 2 teach such a slide distributor is advantageous because it is compact, requires only one location and moves the samples very quickly.

It would have been within the skill of the art to modify Miller, Muszak et al. or Carey et al. in view of Hamilton et al. and use a sample moving means that selectively moves samples in a radial direction along a common horizontal plane, to gain the above advantages.

Response to Arguments

Applicant's arguments with respect to claims 3,6-22, 56-59 and 62-71 have been considered but are moot in view of the new ground(s) of rejection.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
